“High quality solutions
in a world of standard products”

ENESSERE, energy division of Autoelettric, is active in the renewable energy technologies market, offering complete solutions for energy independence, without compromising the beauty and pleasure of use.

ENESSERE products are designed to enhance the environment where they are located, promoting a sense of belonging to a new equilibrium between man and nature.

***ENESSERE**, divisione energia di Autoelettric, è attiva nel mercato delle tecnologie verdi offrendo soluzioni per la completa indipendenza energetica, senza compromessi con la bellezza ed il piacere dell'utilizzo. I prodotti **ENESSERE** sono concepiti per valorizzare il contesto dove sono collocati, promuovendo un senso di appartenenza ad un nuovo equilibrio tra essere umano e natura.*

Autoelettric is an Italian company, founded in 1984. Our company specializes in the development, manufacture and testing of relays ranging from 10A to 600A. Additionally, we produce a wide range of electronic components, such as timer units and flasher units for cars, trucks, motorcycles and the newer generation of electrically powered vehicles.

Autoelettric has evolved in recent years from a traditional manufacturer to an innovation orientated company. We develop and produce entirely in Italy a few lines of strategic products, by upholding our commitment to test and approve all components that we import into our plants.

We consider ourselves a technology company that tailor-makes electronic solutions, which are innovative and highly personalized. We fit in a category between a traditional craftsman and the Italian automotive industry: the passion and satisfaction in creating well made products is part of our heritage that we proudly carry in our hearts.

We are committed to building an eco-friendly company. Our working environment is not only intended to stimulate innovation but also to insure the well being of our work force. Our company guidelines mandate energy saving, the use of renewable energy whenever possible, and clean industrial processes.

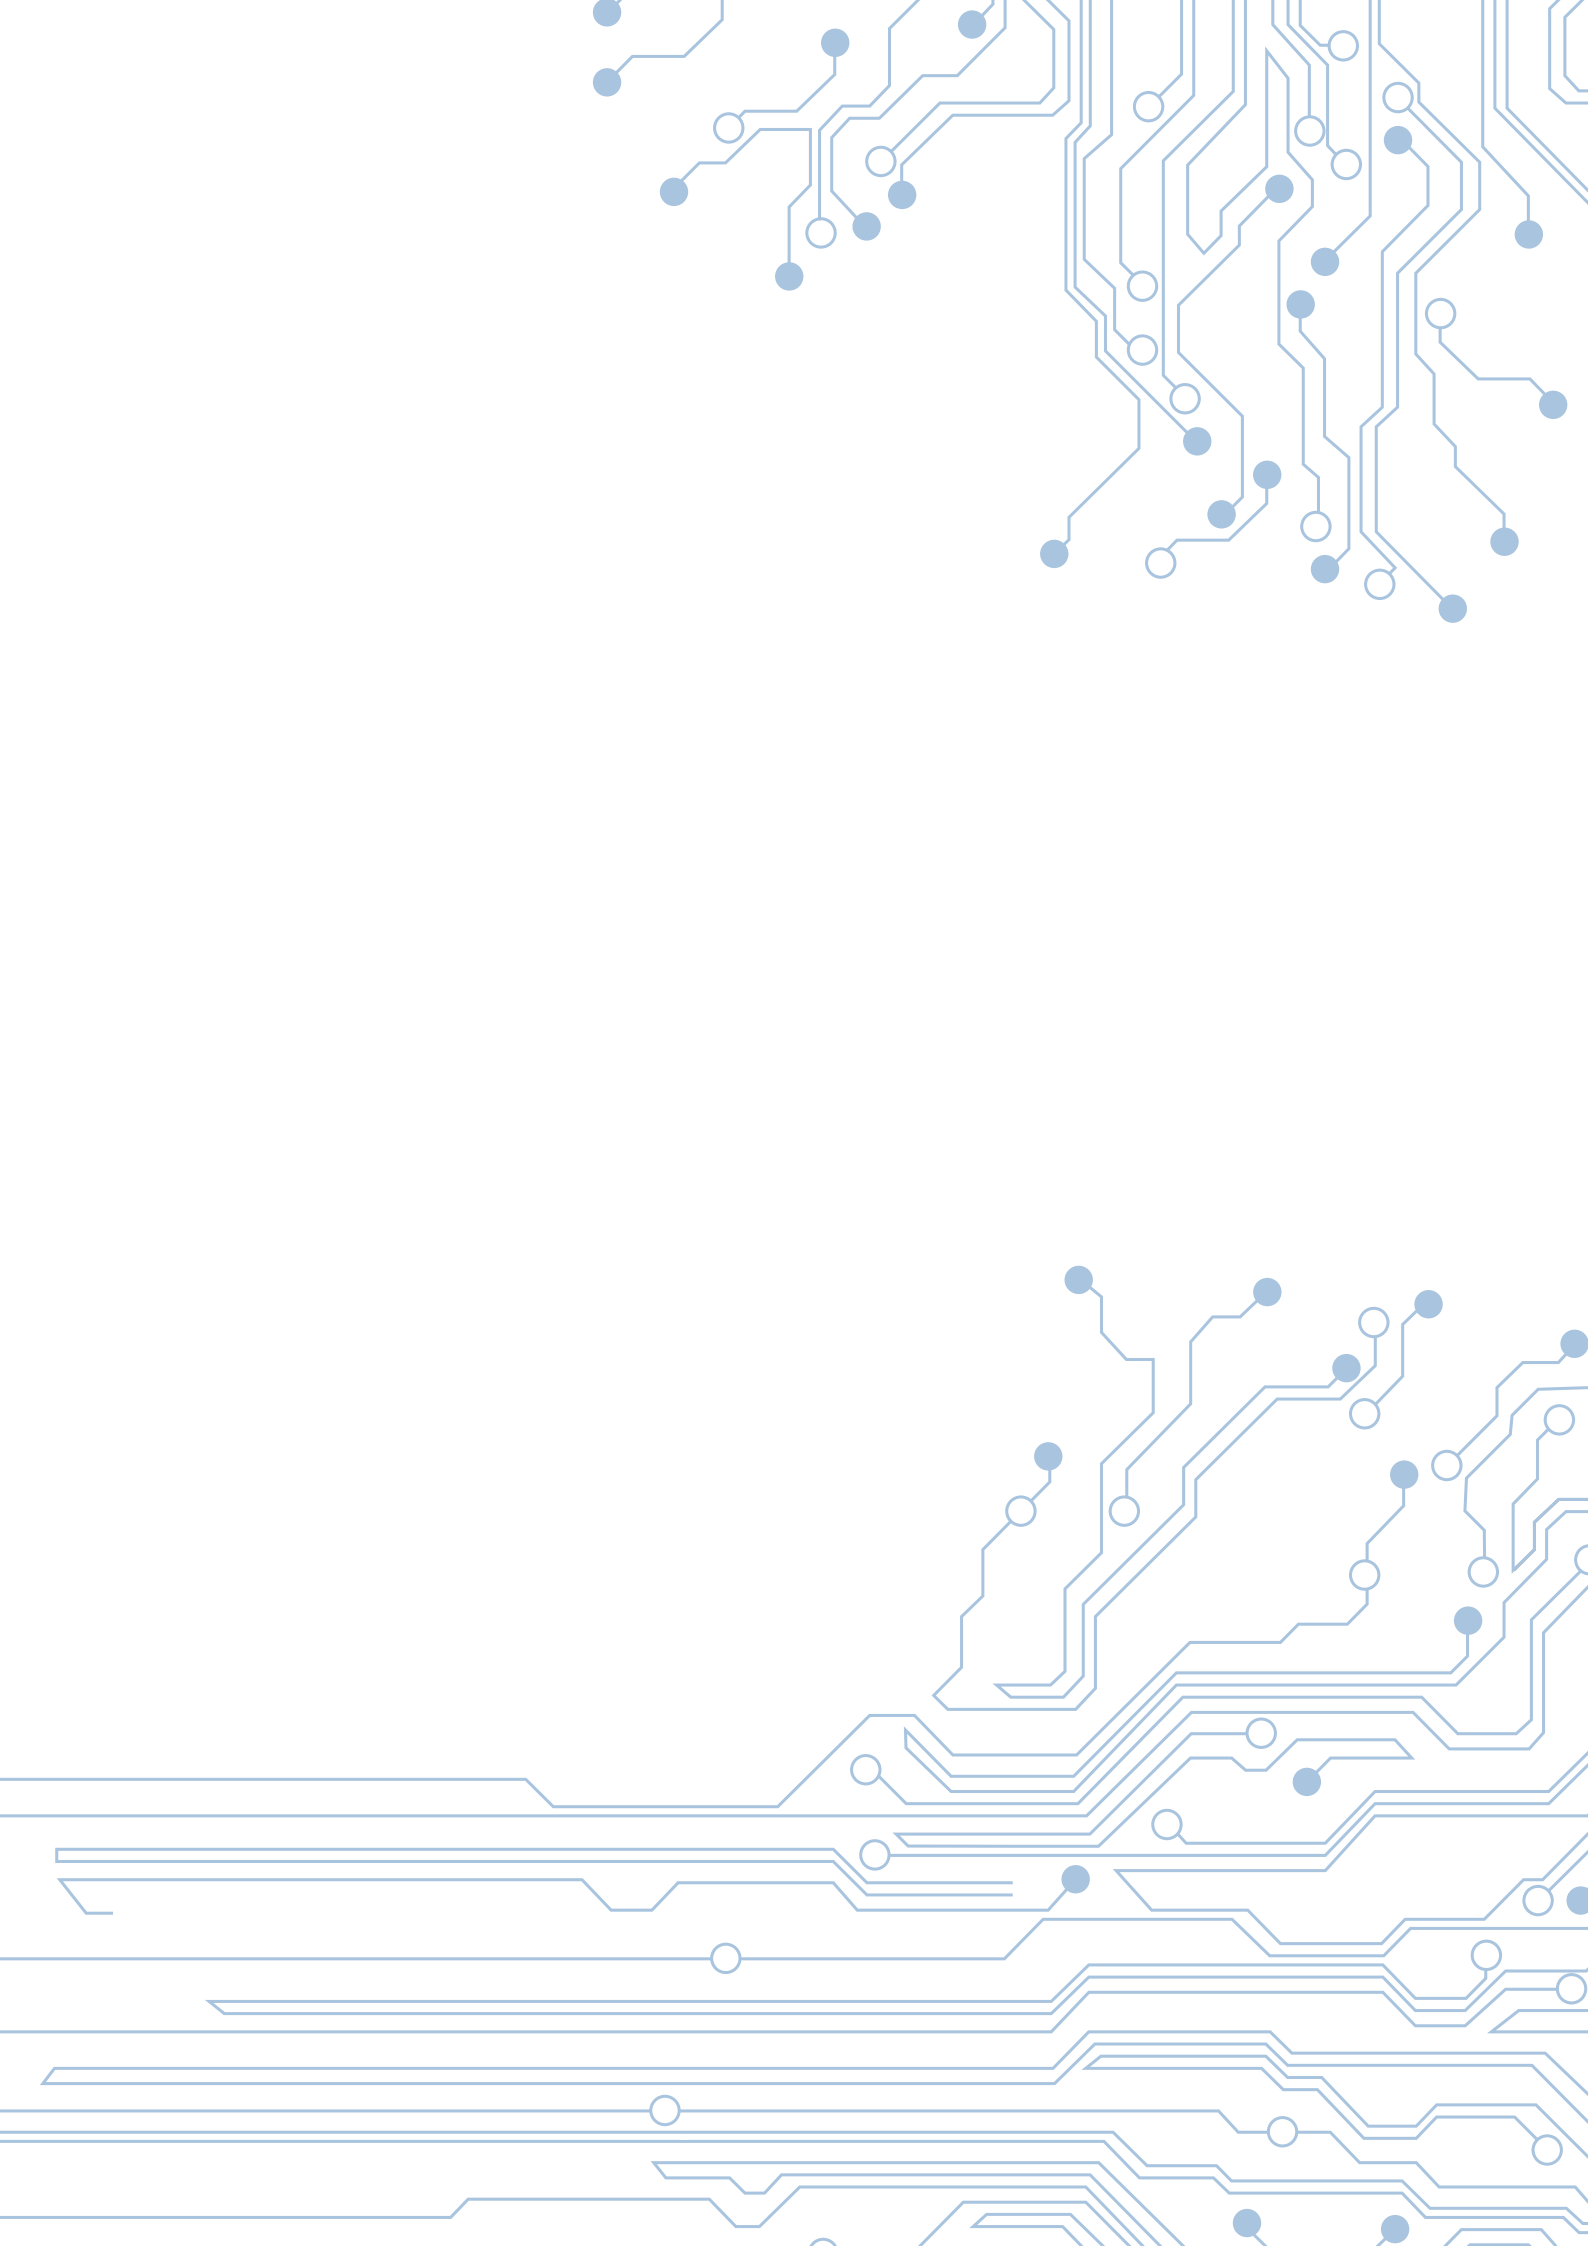

Autoelettric, fondata nel 1984, è specializzata nella produzione, collaudo e sviluppo di relay dai 10A ai 600A, di relay temporizzati e di una serie completa di centraline per la gestione dei lampeggiatori di direzione. Offriamo soluzioni elettroniche su misura per auto, camion, moto e per tutti i nuovi veicoli ad azionamento elettrico.

Autoelettric era una azienda di produzione tradizionale, ora siamo diventati una azienda orientata all'innovazione: ci proponiamo di sviluppare e produrre interamente in Italia alcune linee di prodotti strategici, mantenendo fermo il nostro impegno di testare e collaudare ogni semilavorato che importiamo presso la nostra sede.

Ci consideriamo una azienda di tecnologia che offre soluzioni elettroniche su misura innovative e altamente personalizzate, ci collochiamo a cavallo tra la tradizione artigiana e l'industria automotive italiana: la passione e la soddisfazione che ancora proviamo nel realizzare prodotti ben fatti è una eredità che con orgoglio ci portiamo dentro.

Ci impegniamo per realizzare una azienda eco sostenibile, dove il luogo di lavoro sia da stimolo per l'innovazione e un'occasione di benessere per tutto lo staff. L'utilizzo di energie rinnovabili, di processi industriali a basso impatto ambientale e il risparmio energetico sono le nostre linee guida.
