

new RMS mounting system

New and old DBS mounting

M400002 Gooseneck

M400006

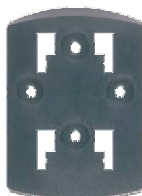

M400005

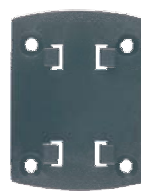

M400004

M400003

M400000

M400001

New DBS mounting system RMS:

We are going to offer a professional flexible **RMS (rugged mounting system)** mounting system for the IBS-DBS (optionally available also for the DBi, OX, TJM DBS) replacing the 3M DualLock mounting. The base system exists of M400000, which is bolted with 4 M3 screws into the insertion nuts in the bottom case of DBS and the counter part adapter M400001. Instead of M400001 all the other mounting systems (M400002-6) can be ordered as accessory.

M400010 is an up-grade kit for customers wanting to change from DualLock to RMS (mechanical skills required!). Included are M400000, M400001, 4x M3 insertion nuts and 4x M3 bolts.

Final mounting is a simple slide-hook movement and the unit are securely fixed to the installed adapter or car mount.

We believe this mounting system is a great improvement and adds long time value to the whole DBS.

Available product range:

- M400000 Monitor Mount adapter (bolt on/sticky tape)
- M400001 Counter part adapter for M400000
- M400002 Car mount Gooseneck
- M400003 Car mount suction disc 4 axles
- M400004 Car mount suction disc 2 axles
- M400005 Car mount swivel socket
- M400006 Car mount horizontally adjustable
- M400010 Up-grade kit for DBS with DualLock

Advantage:

- Mounting solution for every car and 4WD set-up
- Very rugged vibration free mounting
- Depending on model various adjustment possible

Availability:

Q1/2007, production in progress
